

JONATHAN ZARATE

SENIOR SOFTWARE ENGINEER | ENTERPRISE PLATFORMS | PRODUCT ENGINEERING | TECHNICAL LEADERSHIP

jvmz.dev@gmail.com | [LinkedIn](#) | [Portfolio](#) | Welland, Ontario

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience delivering customer-facing products, enterprise platforms, and integrations. At CanadaHelps, lead end-to-end delivery across React, TypeScript, .NET/C#, REST APIs, SQL Server, and Azure. Earlier spent more than six years in enterprise consulting across retail, utilities, healthcare, nonprofit, insurance, and financial-services clients including Canadian Tire, Toronto Hydro, Manulife, Lee Health, RBC, Orbis International, Investment Planning Counsel, Broadridge, and FNF Canada. Experienced in system design, technical delivery, modernization, production support, mentoring, and cross-functional execution.

CORE EXPERTISE

Architecture & Leadership: System design, feature architecture, estimation, code review, mentoring, root-cause analysis, production support

Product Engineering: React, TypeScript, JavaScript, Angular, Vue.js, HTML/CSS, reusable UI systems, analytics/integrations

Backend & Integration: .NET/C#, Java, REST APIs, OAuth 2.0, SQL Server, MySQL, IBM WebSphere, enterprise integration

Platforms & Delivery: Azure, GitHub Actions, Azure DevOps, Jenkins, Docker, CI/CD, Git, Liferay DXP, OSGi, Spring MVC, Tomcat

PROFESSIONAL EXPERIENCE

Senior Software Engineer | [CanadaHelps](#)

11/2021 - Present

Remote / Toronto, ON

- Lead features end to end across solution design, frontend architecture, backend integrations, testing, release validation, deployment, and production support in close collaboration with product, design, QA, and engineering stakeholders.
- Led architecture and implementation of a multi-step charity onboarding experience, translating evolving requirements into reusable workflows, third-party integrations, analytics, testing, and rollout while delivering more than 2x the originally planned scope.
- Build and enhance donation-platform capabilities using React, TypeScript, .NET/C#, REST APIs, SQL Server, and Azure; CanadaHelps reported \$529M in digital donations processed through its platform in 2025.
- Improve API and integration reliability through performance tuning, defect resolution, root-cause analysis, automated testing, feature toggles, and repeatable CI/CD practices.
- Assess technical risk, create estimates, review code, facilitate design and Agile ceremonies, and provide technical guidance across frontend and backend work.

Mississauga, ON

- Delivered enterprise web platforms and integrations for clients across retail, utilities, healthcare, nonprofit, insurance, and financial services using Java, JavaScript/TypeScript, Angular, REST APIs, Liferay DXP, Spring MVC, OSGi, Gradle/Maven, Tomcat, SQL/MySQL, Docker, and Jenkins.

Selected client engagements

- **Canadian Tire Corporation** - built and enhanced an enterprise portal connecting the business, dealers, supply chain, and customers; contributed across Java/Liferay, Angular/Vue, data-grid experiences, MySQL, Docker, Jenkins, and production support.
- **Manulife** - contributed to Liferay-based portal solutions by creating and updating custom Liferay themes, supporting branded portal experiences and ongoing frontend enhancements.
- **Toronto Hydro** - contributed to a Liferay-based customer self-service portal where customers could sign in and view their bills, supporting customer-facing portal development and account-access experiences.
- **Lee Health** - consulted on a Liferay DXP solution in 2021 while collaborating with members of the Liferay team through Veriday's partner practice. **Orbis International** - modernized existing web applications toward OSGi-based architecture using Java, Spring MVC, Maven/Gradle, and Liferay.
- Financial-services platforms - **Investment Planning Counsel**, **Broadridge**, and **FNF Canada**: delivered client-facing and advisor/business portal capabilities using Java, REST technologies, Spring MVC, Tomcat, and enterprise CMS/platform tooling.
- **Royal Bank of Canada** - supported an enterprise integration team building a mobile banking and investment application using IBM WebSphere Application Server, WebSphere Message Broker, Java, ESQ, RFHUtil, and SVN.

INDUSTRY PARTNERSHIP & MENTORSHIP

Industry Partner / Capstone Client & Mentor | Sheridan College**2019 - 2020**

Ontario

- Partnered with Sheridan College as an alumni industry client for a student capstone team building a React Native mobile application for crowdsourced local deals, where users could report offers and discover deals shared by the community.
- Defined product requirements and Jira work, collaborated on system architecture, wireframes, use cases, Scrum planning, and implementation, and provided technical mentorship, code reviews, and React Native guidance.

CREDENTIALS & EDUCATION

Liferay DXP Certified Professional Developer**Computer Systems Analyst, Advanced Diploma - Sheridan College, 2011 - 2014****1st Place Capstone Project - Peel Region** industry client; developed an end-to-end hybrid application to help residents discover local trails, promote healthy activity, and support alternative transportation.
