

JONATHAN ZARATE

SENIOR SOFTWARE ENGINEER | ENTERPRISE PLATFORMS | PRODUCT ENGINEERING | TECHNICAL LEADERSHIP

647-581-1715 | jvmz.dev@gmail.com | [LinkedIn](#) | Welland, Ontario

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience delivering enterprise and customer-facing web applications across product engineering, frontend architecture, backend integration, cloud delivery, and enterprise platforms. Current work spans React, TypeScript, .NET/C#, REST APIs, SQL Server, and Azure at CanadaHelps, with earlier specialization in Java and Liferay DXP consulting. Liferay DXP Certified Professional Developer experienced leading feature architecture and end-to-end delivery, improving API performance, supporting modernization initiatives, resolving production issues, mentoring developers, and collaborating with product, QA, design, architecture, and engineering stakeholders.

CORE SKILLS

Architecture & Leadership: system design, feature architecture, technical estimation, code review, mentoring, root-cause analysis, production support, end-to-end delivery, Agile/hybrid delivery

Frontend: React, TypeScript, JavaScript, Angular, AngularJS, Vue.js, HTML, CSS/Sass, ag-Grid, Vuetify

Backend & APIs: C#, .NET, Java, RESTful APIs, OAuth 2.0, JSON, SQL Server, MySQL, API integration, microservice integration

Enterprise Platforms: Liferay DXP, Liferay 6.2, OSGi, Spring MVC, IBM WebSphere, WebSphere Message Broker, Tomcat, Microsoft SharePoint

Cloud & DevOps: Microsoft Azure, Azure DevOps, GitHub Actions, Jenkins, Docker, CI/CD pipelines, Git, Gradle, Maven, automated testing, feature toggles

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CanadaHelps

Remote / Toronto, ON | 11/2021 - Present

Engineer and enhance cloud-native donation platform features using React, TypeScript, .NET/C#, REST APIs, SQL Server, and Microsoft Azure for a high-scale platform that processed more than \$500M in digital donations in 2025.

Led architecture and implementation of a multi-step charity onboarding platform, translating evolving product requirements into reusable UI workflows, API integrations, test plans, release validation, and production rollout while delivering more than 2x the originally planned scope.

Optimized and maintained RESTful APIs, improving performance by 30% while strengthening scalability, security, and user-facing responsiveness.

Deliver features end to end across frontend, backend integrations, testing, deployment, and production support in close collaboration with product, design, QA, and engineering stakeholders.

Assess technical risk, create estimates, design solutions, review code, facilitate design and Agile ceremonies, and lead root-cause analysis for production incidents and integration issues.

Use Azure DevOps, GitHub Actions, Git, CI/CD pipelines, feature toggles, and automated testing to support repeatable cloud deployments and reduce release risk.

Software Engineer / Liferay Consultant | Veriday Inc.

Mississauga, ON | 02/2015 - 11/2021

Delivered full-stack enterprise web applications and customer portal solutions using Java, JavaScript/TypeScript, Angular, REST APIs, Liferay DXP and Liferay 6.2, Spring MVC, OSGi, Gradle/Maven, Tomcat, SQL/MySQL, HTML, and CSS/Sass.

Developed UI and REST services for Liferay-based web applications and provided training, technical support, and documentation for portal-based solutions.

Built and enhanced a Canadian Tire enterprise portal designed to connect the business, dealers, supply chain, and customers using Liferay DXP, Java, Angular, Vue.js, ag-Grid, Node.js, MySQL, Docker, and Jenkins.

Consulted on a Liferay DXP solution for Lee Health in 2021, working alongside the Liferay team through Veriday's Liferay Platinum Partner practice.

PROFESSIONAL EXPERIENCE - CONTINUED

Worked on Orbis International's upgrade of existing web applications to OSGi using Java, Spring MVC, Liferay 6.2/Liferay DXP, Maven, and Gradle.

Delivered portal-based solutions for Investment Planning Counsel, Broadridge, and FNF Canada using Java, Liferay 6.2, Spring MVC, REST technologies, Maven/Gradle, Tomcat, JavaScript, and CSS.

Developed and integrated secure REST-based features across Java/Liferay applications, authentication and OAuth workflows, CRM connectivity, and client-specific enterprise systems.

Worked across requirements, estimates, technical design, implementation, code review, testing, deployment, root-cause analysis, and production support in Agile and hybrid delivery environments.

Contributed to a phased AngularJS-to-Angular 2 modernization, converting legacy controllers, templates, and services into reusable component-based features while preserving integration with existing backend APIs.

Supported RBC as part of an enterprise integration team building a mobile banking and investment application using IBM WebSphere Application Server, WebSphere Message Broker, Java, ESQ, RFHUtil, and SVN.

Contributed to Network of Giving, a non-Liferay Java and AngularJS application using JHipster, Tomcat, and Node.js, gaining exposure to micro-frontend architecture concepts.

SELECTED LIFERAY PORTAL ENGAGEMENTS

Lee Health - consulted on a Liferay DXP solution in 2021 while working alongside the Liferay team through Veriday's Liferay Platinum Partner practice.

Canadian Tire Corporation - enterprise portal connecting the business, dealers, supply chain, and customers; technologies included Java, JavaScript, Angular, Vue.js, ag-Grid, Liferay DXP, Tomcat, MySQL, Docker, and Jenkins.

Orbis International - upgrade of existing web applications to OSGi using Java, Spring MVC, Liferay 6.2/Liferay DXP, Maven, and Gradle.

Investment Planning Counsel - portal-based solution connecting the business, financial advisers, and clients using Java, JavaScript, Spring MVC, Maven/Gradle, OSGi, and Liferay 6.2.

Broadridge and FNF Canada - client-facing portal solutions using Java, JavaScript, Spring MVC, Maven, Tomcat, Velocity, and Liferay 6.2.

EARLIER EXPERIENCE

Enterprise Architecture Analyst - Co-op | Canadian Tire Corporation

Toronto, ON | 09/2013 - 05/2014

Supported enterprise architecture tooling, artifact management, and technical research; presented findings and recommendations to architecture stakeholders.

Technical Support Analyst - Co-op | Sheridan College

Oakville, ON | 09/2012 - 01/2013

Resolved hardware, software, and account issues across multiple support channels; provided knowledge transfer and mentoring to team members.

Signals Operator | Canadian Armed Forces

Canada | 05/2006 - 06/2008

Operated and maintained communications systems in a high-accountability team environment.

CERTIFICATION & EDUCATION

Liferay DXP Certified Professional Developer

Computer Systems Analyst, Advanced Diploma - Sheridan College, 2011 - 2014
